SRIVARSHINI R S

SOFTWARE ENGINEER

Bengaluru, India • srivarshini0402@gmail.com • https://linkedin.com/in/srivarshini-r-s-21 • https://github.com/srivarshini-21

PROFESSIONAL SUMMARY

Software Engineer with experience building a geospatial SaaS product from initial technical feasibility to production. Skilled in full-stack development, geospatial data processing, multi-tenant systems, subscription workflows and test automation, with additional exposure to DevSecOps and infrastructure security.

PROFESSIONAL EXPERIENCE

Latlong | **Software Engineer** | June 2026 – Present
Previously Software Engineer Intern | November 2025 – May 2026

- Contributed to building **Aaloka from initial technical feasibility to a functioning geospatial SaaS product**, working across architecture, frontend, backend, databases and visualization.
- Established and refined the **PostgreSQL/PostGIS → GeoJSON → SVG pipeline**, solving complex geometry and projection challenges to enable interactive multi-level maps covering 176+ countries; developed dynamic labels, annotations, geographic point placement and map customization.
- Built advanced visualization and data capabilities, including **production 3D polygon extrusion** and an interactive data editor supporting multi-column computations, validation and persistent derived columns.
- Designed and implemented **multi-tenant identity and policy workflows**, covering registration, tenant assignment, role-based access, policy transitions, Studio invitations and existing-user migration.
- Built production **subscription and licensing workflows** supporting free/postpaid conversions, team management, license allocation, tenant reassignment and member data migration/deletion. Developed database structures subsequently used as references for invoice functionality.
- Designed and extended a **Playwright E2E suite to 125 tests across 31 spec files and 13 helper modules**, implementing test strategy, authentication seeding, database-safe cleanup, environment safety gates and structured JSON reporting.
- Developed an S3-backed public map gallery and admin management interface; also integrated **Trivy Docker image vulnerability scanning** into a Jenkins staging pipeline with automated JSON/Markdown reports and Microsoft Teams notifications.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Python
Frontend: React, Next.js (App Router), Tailwind CSS, Zustand, SVG
Backend: Node.js, Next.js Server Actions, REST APIs
Databases: PostgreSQL, PostGIS, Spatial SQL, MongoDB
Geospatial: GeoJSON, geographic data processing, map projections
Cloud & Tools: Git, Linux/Ubuntu

PROJECTS

VidhiWise | ***React.js, Node.js/Express, MongoDB, LLM, NLP, RAG***

- **Led development of a full-stack legal-tech platform** using React.js, Node.js/Express, MongoDB, and **integrated LLM/NLP pipelines for** AI-assisted legal document and case-law workflows.
- **Built AI-powered document processing features** including document upload, streaming summarization in **English, Hindi, and Kannada**, text-to-audio generation for summaries in all three languages, legal glossary assistance, and authenticated document generation, integrating LLM inference with the application backend.
- **Implemented a RAG-based case-law workflow** using legal-document retrieval, embeddings, and Indian Kanoon data to match user queries and documents with relevant case law and surface supporting judgments.
- **Developed the application end-to-end**, including authentication, public/private feature separation, API integration, dashboard functionality, and responsive UI using React and Tailwind CSS.

EDUCATION

Jyothy Institute of Technology — VTU | Bengaluru, India | B.E. Information Science and Engineering | 2022 – 2026 | CGPA: 9.0

CERTIFICATIONS

- **Networking Basics** — Cisco Networking Academy (Apr 2025)
- **HTML and CSS Essential Training** (Oct 2024)
- **DBMS Course** — Scaler (Sep 2024)
- **Introduction to Cybersecurity** — Cisco Networking Academy (Mar 2023)

LEADERSHIP & EXTRACURRICULAR

- Conducted an 8-day workshop for first-year students, mentoring them in HTML, CSS, and JavaScript.
